PATIENT'S NAME (Last, First, Middle Name)				DATE/TIME OF EXAM
Sioson, Pauline Malong				01/23/2024 11:31 AM
PIN	BIRTHDATE	AGE/GENDER	ROOM/BED	REQUESTING PHYSICIAN
1810134979	05/06/1994	29Y 8M / F	OPD	LIPANA, RENATO JR. DIZON M.D.

**HISTORY:** Back pain one week; to consider spondylolisthesis

**TECHNIQUE:** AP and lateral views

**FINDINGS:**

Mild posterior wedge deformity of L5 is observed. The rest of the vertebral heights, disc spaces and lumbar lordosis are maintained.

Suspicious lucency and irregularity is appreciated in the posterior element of L5. The rest of the posterior elements are intact.

Slight anterior displacement of L5 in relation to S1 is seen.

Sacrococcygeal bones are in alignment with line of weightbearing falling anterior to the sacral promontory.

No paraspinal mass noted.

**IMPRESSION:**

Mild L5 posterior wedge deformity

Grade 1 anterolisthesis L5 over S1 with probable spondylolysis

Predisposed to lumbosacral instability

*This radiologic interpretation is only a part of the overall assessment of a patient's condition. It must be correlated with the clinical, laboratory and other ancillary parameters for a comprehensive analysis. Therefore, radiology reports are best explained by the attending physician to the patient. Images are available in the PACS for your inspection.*
