

This highly versatile projector series harnesses Epson's latest 3LCD technology to deliver professional high image-quality presentations ideal for school and business environments.

## · Enjoy ease of use and operation

With H/V keystone correction and 1.6x zoom lens (for selected models only), it's never been easier to project a sharp professional image customised to your display space

- Deliver effective presentations with enhanced audio Microphone input is available and the powerful 16W built-in speaker delivers high-quality sound even in large rooms
- Reduce Total Cost of Ownership
   With a long lamp life of 6000 hours and a high-efficiency filter, maintenance cycles are extended and costs reduced
- Do more with wider connectivity options
   Link up multiple devices and accessories such as HDMI, LAN cables, document camera, microphone and PCs for even greater options for use

This highly versatile projector series harnesses Epson's latest 3LCD technology to deliver professional high image-quality presentations ideal for school and business environments.

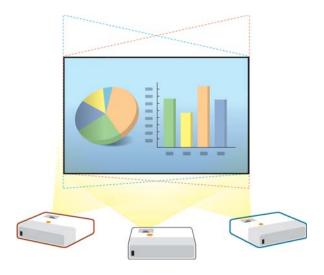

EB-95/96W/905/915W/925

# **ENJOY EASE AND VERSATILITY OF USE AND OPERATION**

# Greater Placement Flexibility with Keystone Correction

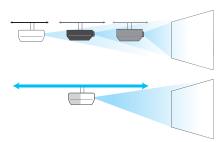

This projector series features both horizontal and vertical keystone correction, giving you greater choice of projector placement at different angles. You no longer have to limit placement to the centre of the desk.

## 1.6x Zoom Lens\*

The wide 1.6x zoom lens gives you even greater flexibility in projector placement within the room. This allows the projector to fit perfectly into the already existing mounting position of the previous projector.

\* for EB-905/915W/925 only

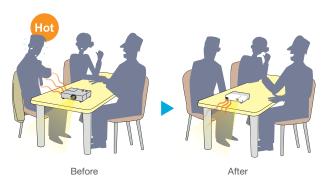

# Longer Projector Foot Stand

With a longer foot stand, you have a greater range of projection placement possibilities without the need to use external objects to adjust the projection angle.

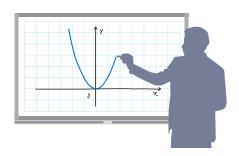

# Frontal Exhaust

Enjoy greater flexibility in seating arrangements around the projector. With the exhaust positioned at its front, none of your audience will be exposed to and distracted by the hot exhaust.

# **Template Function**

Keep your whiteboard presentations professional by projecting a choice of line templates on your whiteboard to guide your writing and arrange your writing space.

# Bigger Control Panel

The bigger control panel and clear lettering allow for easier projector operation, especially when your projector is ceiling mounted.

# Multiscreen Display

Great for summaries at the end of your presentation, the multiscreen display function allows you to show your audience multiple screens at the same time.

# DELIVER POWERFUL PRESENTATIONS WITH ENHANCED AUDIO

# Powerful 16W Built-in Speaker

The powerful 16W built-in speaker replaces the need for an external speaker and delivers high-quality output even in large rooms.

# Microphone Input

For professional presentations in larger rooms, simply plug in a microphone to the microphone input terminal to enhance audio effectiveness.

# REDUCE TOTAL COST OF OWNERSHIP

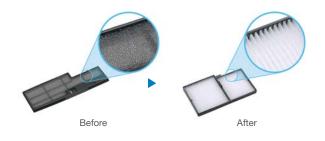

# 6000-hour-long Lamp Life & Easy Lamp Replacement

With longer lamp life up to 6000 hours, the lamp unit need not be replaced as often, allowing you to save on maintenance time and costs.

# High-efficiency Filter

The new electrostatic filter has a surface area more than double that of current models. This extends the maintenance cycles to up to 5000 hours, leading to dramatic savings in time and maintenance costs.

#### DO MORE WITH WIDER CONNECTIVITY OPTIONS

This projector series offers advanced connectivity features that allow you to incorporate additional technology to make more effective and convenient presentations. Its wide-ranging compatibility with devices like HDMI, LAN cables, document camera, microphone and PCs make it well suited to any classroom or large room setting.

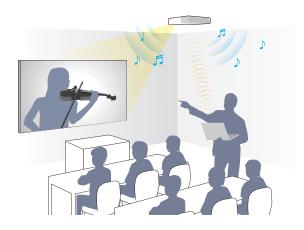

# USB Display 3-in-1

Projection setup has been made so easy. This projector series allows control, image and sound transmission from a computer to projector via a simple USB cable. No complicated cabling is needed.

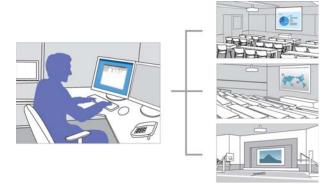

#### Wireless Connection

Complicated cabling becomes a thing of the past with this projector series allows you to connect wirelessly through LAN and to your computer. In addition, direct wireless connection between the projector and your computer, and wireless transmission of sound are possible.

# Monitor and Control All Your Projectors from a Single PC

With Easy MP Monitor, Epson's proprietary network monitoring software, you can easily monitor all your projectors and keep them running efficiently, even across the largest networks. Configure remotely and programme email alerts for pre-defined critical indicators such as non-functioning devices or overheating lamps.

# Connect Directly to Epson Portable Document Camera ELPDC06

Designed to better assist the way you teach or present, this projector series conveniently connects directly to your Epson Portable Document Camera via USB cable for more effective presentations.

# **Eco Features**

- Equipped with Epson proprietary lamp that is engineered to maximise light usage efficiency
- Uses 0.39W 0.40W of power in standby mode
- Projector optics employ lead-free lenses
- Unpainted plastic housing reduces the environmental impact
- The flame retardants used in the plastic housing do not contain chlorine or bromine

#### Better Products for a Better Future

# PARTNERS IN PERFECTION

## Ultra portable Document Camera ELPDC06

Easily portable; 0.96 kg/2.11 lbs 1.92 megapixels with 15fps 4 x digital zoom USB powered

## Desktop Document Camera ELPDC11

2.2 kg/4.85 lbs 5 megapixels with 30fps 10 x digital zoom Bundled with microscope adaptor

# Interactive Unit ELPIU01

USB powered Easy interactive function Simple and easy set up

# Epson Revolutionises Projector Market with 3LCD Technology and Leads as World's No.1\* Projector Brand for 9 Consecutive Years!

\* Based on independent research by Futuresource Consulting

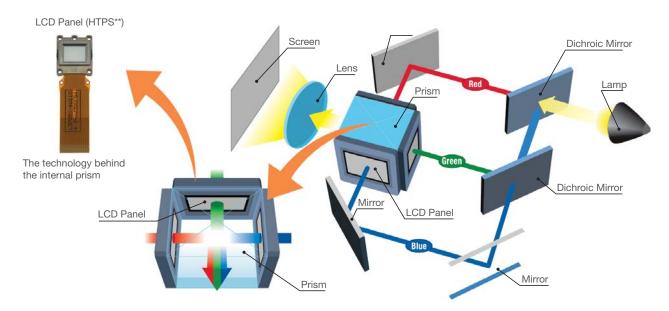

# **Advantages of 3LCD Projection System**

# Bright Images and Faithful Colour Reproduction

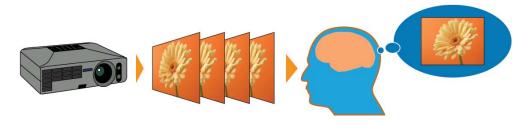

3LCD projectors offer all-time colour (Red, Green and Blue) projection thereby ensuring faithful full colour reproduction. This is suitable for projection of colour intensive images such as videos, photographs and colour charts.

# Incredible Details

3LCD projectors are able to produce an unparalleled range of grayscale images, which contributes to delivering incredible colour images that are smooth and seamless.

3LCD projector: RGB are projected at the same time, which makes the single composite image easy on the eyes.

\*\* HTPS (High Temperature Poly-Silicon) is an active matrix transmissive LCD. It is extremely small and produces high-quality images.

# Gentle on the Eyes

3LCD projectors' images do not suffer from colour break-up (commonly known as the rainbow effect). The projections are easy on the eyes as you will not be affected by any distorted pattern.

3LCD projectors use 3 separate LCD panels to form a continuous image containing all colours (red, blue and green) ensuring smooth video playback, even for rapid-motion images.

# Reliable Technology

With more than 60 million 3LCD chips shipped to date, the powerful and road-tested 3LCD projection technology is extremely reliable, and is trusted by many throughout to deliver sharp and true-to-life images.

# **Colour Light Output**

- an easy way to evaluate projector colour output

# What is Colour Light Output?

Colour Light Output (CLO) is a specification that provides critical information on a projector's ability to deliver colour. Developed by colour scientists using the same approach as White Light Output (Brightness) measurement, Colour Light Output provides the buyer with additional key information about colour.

# Does Brightness measure colour?

No. Current product specifications such as Brightness (or White Light Output), Contrast Ratio and Resolution give no information regarding a projector's ability to reproduce colour. The existing Brightness specification only measures the total amount of White Light projected. It does not measure colour – in fact, many manufacturers artificially boost brightness by adding white light, which dilutes the projector's colour brightness.

# Why is Colour Light Output important?

Colour Light Output is critically important because it measures the brightness of Red, Green and Blue. Red, Green and Blue create white when combined in the right proportions. They also comprise the input signal that tells your projector how to reproduce colour images. Beautifully balanced colour is possible when bright Red, Green and Blue combine to produce the brightness equal to White. Colour Light Output provides users with an additional way to evaluate a projector and make more discerning buying decisions.

# Is Colour Light Output the same in all projectors?

No. There are vast differences in the Colour Light Output of projectors on the market today. Look at the images below from two competing projectors

3LCD Projector

Image #1\*

Image #2\*

Brand X

Image #1\*

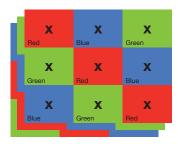

Image #2\*

Colour Light Output specification describes the difference in colour between these two projectors.

# How is Colour Light Output measured?

X	x	X
х	x	X
х	х	x

Brightness (or White Light Output) measures the total amount of white light projected in lumens on a nine point grid. It does not measure colour.

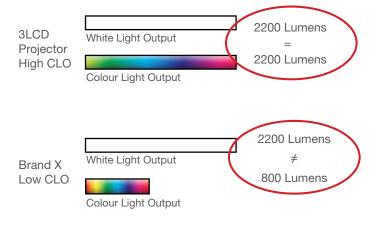

Colour Light Output uses 3 sets of a nine-point grid to measure the primary colours - red, green and blue, using the same approach used to measure White Light Output in lumens

# How should Colour Light Output be used?

Colour Light Output should be used with White Light Output to provide insight into a projector's overall picture quality. Two things to remember:

- 1. Select High Colour Light Output.
- 2. Make sure the Colour Light Output equals the White Light Output.

When selecting a projector, ask for the Colour Light Output measurement.

\* Actual photographs of images produced by 2 competing projectors run in default mode. Price, Resolution and Brightness (White Light Output) are the same for both projectors.
