**Patient Information**

**Specimen Information**

**Facility Information**

**Name:** RHEA SHANE DEOCAMPO DONGON  
**DOB:** 09/23/1988  
**Gender:** F  
**Nationality:**  
**Clinical Notes from Ordering Physician:**

**Accession Number:** COV-72067  
**Date Collected:** 05/13/2022 11:00  
**Date Received:** 05/13/2022 18:40  
**Report Date:** 05/14/2022 06:55  
**Sample Type:**  
 Nasopharyngeal/Oropharyngeal Dry Swab

**Facility Name:** JCL Diagnostic Clinic  
**Provider Name:** Dr. Leni Montes  
**Address:** Isidro Building, Burgos Avenue,  
 Purok Avocado, Brgy. 20, Bacolod City,  
 Bacolod City, Negros Occidental, 6100

**Covid-19 Test Result Summary**

**SARS-COV-2 VIRAL RNA - DETECTED**

Results Comment: Positive for SARS-CoV-2

Processing and Detection Methodology:

Test Performed:  
 SARS-CoV-2 (causative agent of COVID-19) virus detection by Real-Time Polymerase Chain Reaction.

Test Description:

The test includes Ribonucleic Acid (RNA) extraction with RT-PCR amplification and detection of SARS-Cov-2 virus gene, with positive and negative controls on each run. Detection is dependent on the concentration of viral RNA in the specimen and the stage of disease. Quality of the specimen collection can affect the test results. This test was developed, and its performance characteristics determined by, Co-Diagnostics Inc. It has received EUA approval by the Philippine and U.S. FDA. This test is used for clinical purposes and should not be regarded as investigational or for research. This test has been validated in accordance with the FDA's Guidance Document, Policy for Diagnostics Testing in Laboratories Certified to Perform High Complexity Testing under CLIA prior to Emergency Use Authorization for Coronavirus Disease-2019 during the Public Health Emergency, issued on February 29th, 2020. Safeguard DNA Diagnostics Inc. laboratory has been inspected by WHO, DOH and RITM and licensed by the Philippine Department of Health as a COVID-19 testing laboratory.

This report has been electronically validated. No additional signature is required.

Disclaimer: This laboratory result should be interpreted together with the available clinical and epidemiological information. Please see SDDI.com.Ph for more information.

If Final Result is:	Interpretation is:
SARS-CoV-2 viral RNA - DETECTED	Positive for SARS-CoV-2 (causative agent of COVID-19)
SARS-CoV-2 viral RNA - NOT DETECTED	Negative for SARS-CoV-2 (causative agent of COVID-19)
SARS-CoV-2 viral RNA - INCONCLUSIVE	Negative for test internal control (most likely poor specimen quality)
